Description

Desco WallGlass is a reinforced wall and/or ceiling system formulated with advanced polymer chemistry to allow flexibility and toughness. The Series consist of four distinctive derivatives of this proven technology. WallGlass is available in high gloss, semi-gloss or satin finish. WallGlass can be formulated to withstand your demanding chemical exposure.

System Finishes

- S Satin
- SG Semi-Gloss
- G Gloss

WallGlass Series

- FC Fiberglass Cloth – Multilayered polymer system with a core of fiberglass cloth. Cloth weight can be varied for specific application.
- FR Micro Flake Reinforced – A micro flake reinforced system for enhanced impact and chemical exposure.
- FS Fiberglass Strand – A multi layered polymer system with random length fiber glass strands imbedded between resin coats.
- FX Non Reinforced – For primary use on non abusive environments such as above wainscot height on walls and at ceilings. Provides the same look as FC and FR systems.
